

What's Cooking? inaugurates innovative water reuse plant

Our portfolio in Savoury factory Wommelgem

Every day, we produce, slice, package and label amazing tasting cold cuts. Our consumers are in for a treat, with fresh savoury slices that look like they were cut on the spot.

Our ambition as part of our sustainability strategy

What's Cooking wants -30% water consumption per tonne of product sold by 2030.
100% green electricity from 2024
SBTI committed

Investment against water scarcity

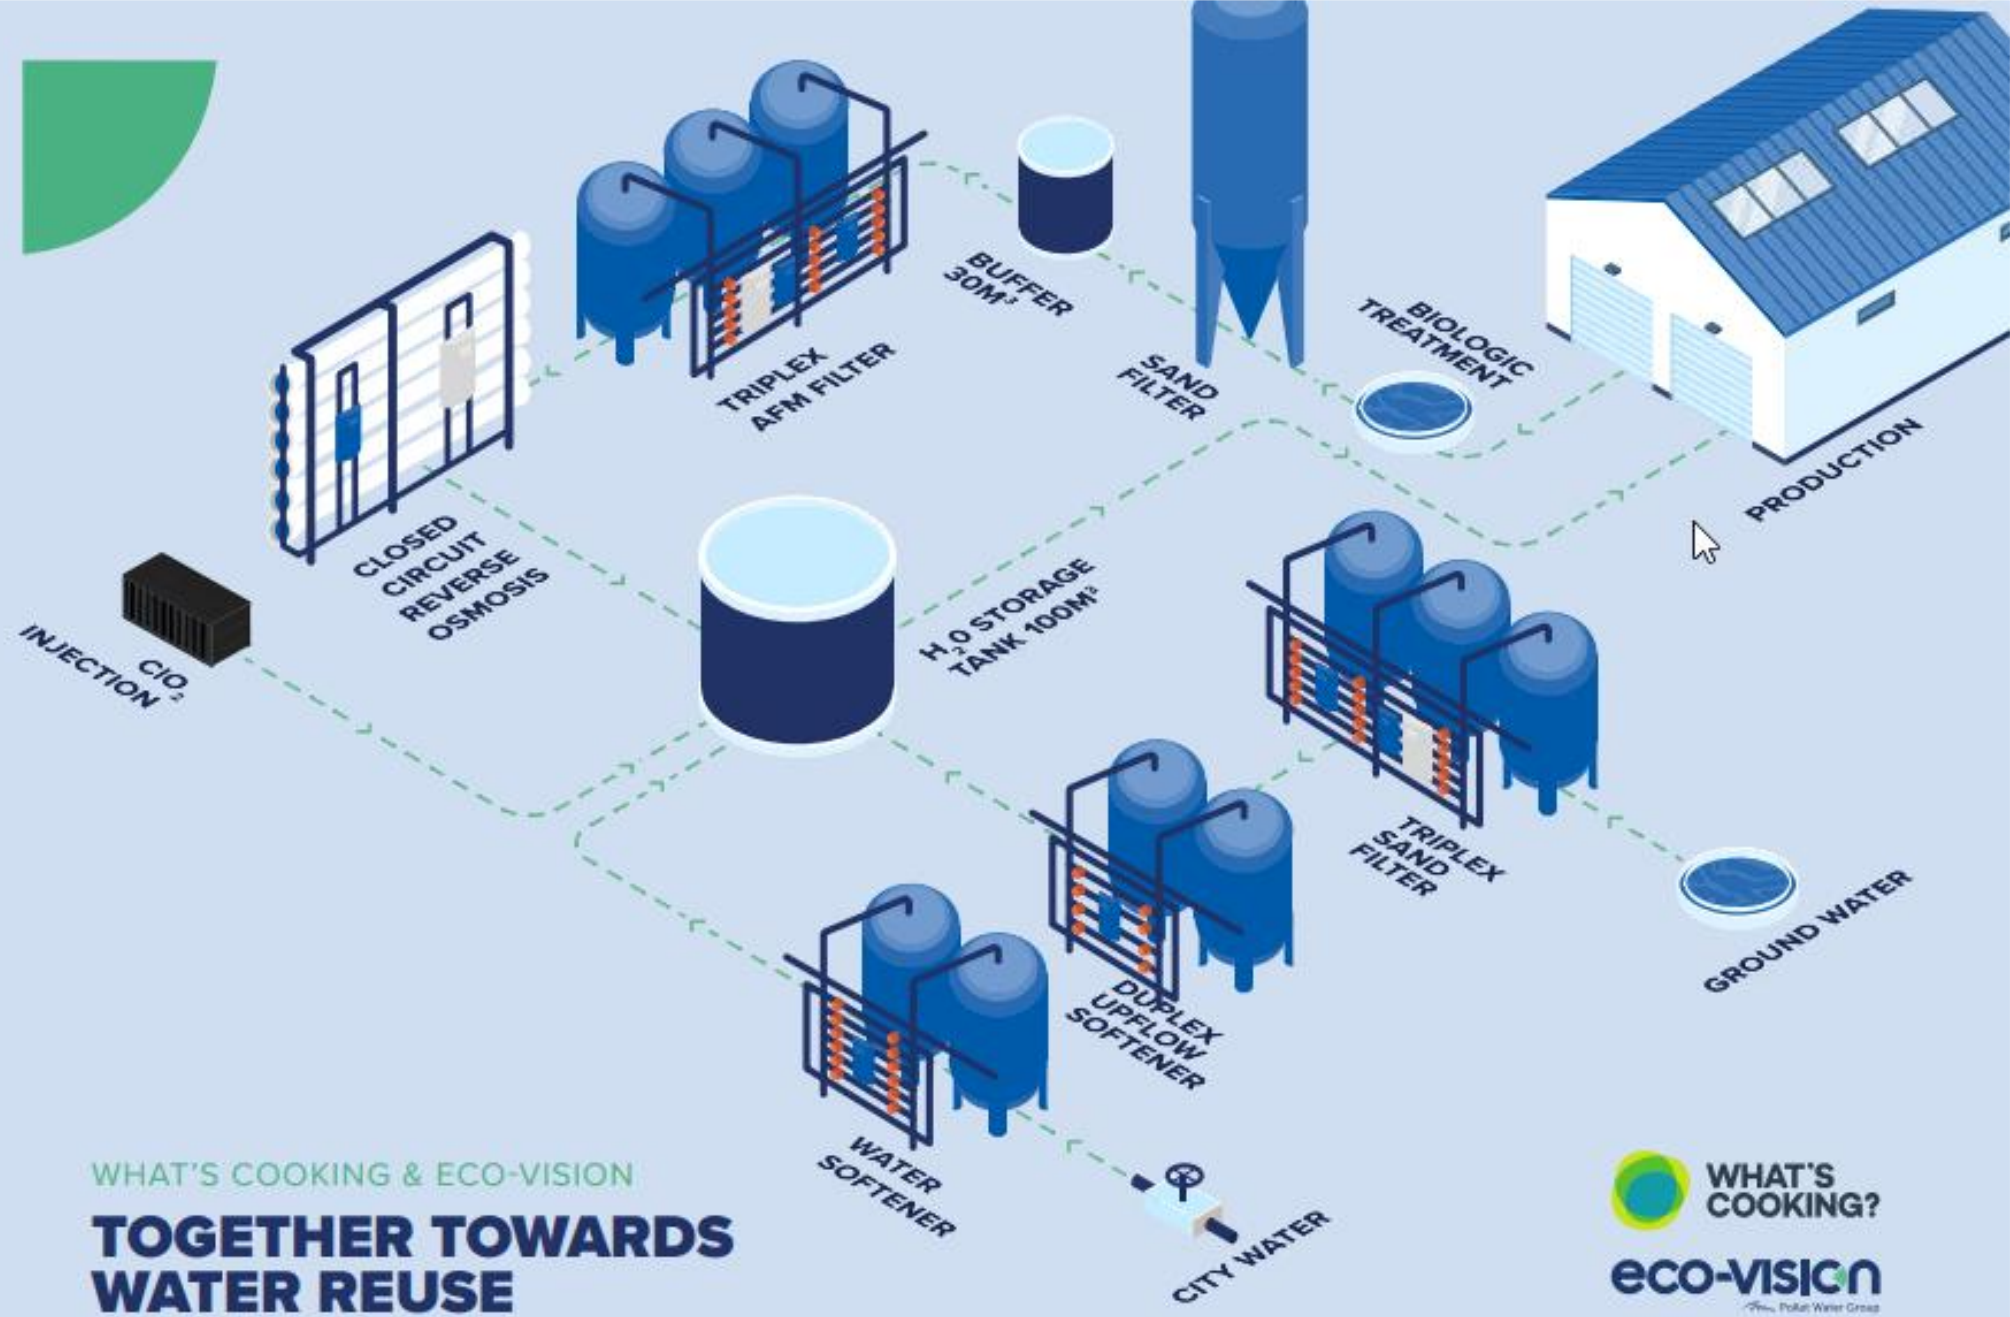

- Partnering with Eco-Vision in Wommelgem in water reuse plant.
- This innovative installation provides 50% less wastewater and consequently 50% less need for groundwater pumping.
- 30m³/h or one olympic swimming pool every 10h; Comparable to 110,000 m³ of water or the total annual consumption of 1,600 households.
